This is our mini catalog of antibody products related to cancer research, sorted in alphabetical order by target gene name.

Anti-EGFR Antibody

The epidermal growth factor receptor (EGFR) is a member of the ErbB family of receptors, a subfamily of four closely related receptor tyrosine kinases. This transmembrane protein is activated by binding of its specific ligands, including epidermal growth factor and transforming growth factor α (TGF α). Mutations affecting EGFR expression or activity could result in cancer.

★★★★★ Excellent

SUMMARY: Anti-EGFR Antibody

"Rabbit antibody EGFR was probed for western blot detection of the recombinant N-terminal domain of human EGFR (100 ng/lane). The antibody nicely detected the protein band with the expected mol.wt. of recombinant protein. The antibody appears to be specific since non-specific bands were not detected in parallel lanes with cell lysates lacking EGFR. I would highly recommend this antibody for detection of EGFR with the intact N-terminal domain."

Cancer Research ELISA Kits

LabNed is proud to present our latest catalog of ELISA kit products. Our high sensitivity, high specificity ELISA kits are thoroughly tested alongside our antibody products. This is our comprehensive catalog of our ELISA kits related to cancer research, sorted in alphabetical order by target gene name.

Mouse TNF Alpha ELISA Kit

Tumor necrosis factor (TNF, TNF α) is a cytokine involved in systemic inflammation and is one of the cytokines that make up the acute phase reaction. It is produced chiefly by activated macrophages, and its primary role is in the regulation of immune cells. As an endogenous pyrogen, TNF is able to inhibit tumorigenesis and viral replication. Dysregulation of TNF production has been implicated in a variety of human diseases including cancer.

"Great TNF alpha Kit"

★★★★★ Excellent

SUMMARY:
[Mouse TNF Alpha ELISA Kit](#)

"This ELISA kit worked as advertised. Wells can be removed as strips, so not everything has to be used. Great product. Results are good and have low %CV. Quick assay kit and cheaper than other companies in my opinion."
